

EQUIPMENT UPGRADE 2.0

Your gear may be years old. It still works.
But is it safe?

DAVID HAAS PHOTO

Most of us don't even think twice about upgrading our computers, our software, our cell phones, our wardrobe, our cars or perhaps even our homes every two to 10 years. But when did you last consider upgrading your essential dive gear? Our equipment allows us to breathe, stay neutrally buoyant and explore underwater.

Maybe it's time you seriously considered replacing some or all of it.
