# THE MARKET'S UP. THE MARKET'S DOWN.

## IT'S TIME TO UPDATE YOUR RETIREMENT PLAN.

### Request This FREE Retirement Guide Today

Even though scientists predict that most Boomers will live well into their 90s, many retirees underestimate the length of time they will need their portfolio to provide for them. When planning for your retirement nest egg, you must consider the direct impact of market volatility on your long-term financial goals.

That's why I urge you to request your free copy of "The 15-Minute Retirement Plan: How To Avoid Running Out Of Money When You Need It Most," published by Ken Fisher, CEO and Chief Investment Officer of Fisher Investments. Illustrated with life expectancy charts, cash distribution scenarios, investor analysis, and more, it can help you determine:

- *Why now is the right time to update your retirement plan*
- *How to carefully consider your time horizon, as you may live longer than you think*
- *How much money you can safely afford to withdraw during that time*
- *How to plan for the survival of your portfolio to your heirs*

Once you're armed with this critical information, you can update your retirement plan without worrying about your finances.
