A Passion For Excellence

ORTHOPEDIC
CENTER OF ILLINOIS

COMPASSION

Healing begins the moment you call the Orthopedic Center of Illinois, from timely appointments and a personalized approach to care that respects and addresses your lifestyle and unique concerns. We believe that you have the right to compassionate, responsive care that not only gets you back to a more active life quickly, but alleviates any fear or pain you experience along the way to recovery.

COLLABORATION

Our team approach brings together specialists in every aspect of orthopedic care. Working in one central, convenient location, we share our knowledge on a daily basis, casually and formally, to ensure the best treatment and rehabilitation possible for you.

Healing Through...

INNOVATION

We're committed to providing the most innovative, cutting edge and highest quality orthopedic services. Our physicians stand at the forefront of surgical treatment of bone and joint disorders, as well as using the latest technologies for minimally invasive procedures.

EXCELLENCE

Since opening our doors in 1972, we've worked hard to excel in every area of orthopedic care, from the superiority of our physicians to our leading edge technology to the relationships we nurture with referring doctors.

“Dr. Senica listened to my questions. In the short time I was there, I had x-rays, saw the doctor who saw the x-rays, and got an injection. I am impressed with my experience.”
– Susan C., Taylorville, IL

A WORLD-CLASS CENTER
For All Of Your Orthopedic Needs.

The Orthopedic Center of Illinois was created in 1972 to provide superior orthopedic care to residents throughout central Illinois. Over the past four decades, we’ve worked passionately to earn our reputation for excellence in the delivery of musculoskeletal care. Today, we offer a full continuum of services needed to support patients with injuries or congenital, degenerative or neurological conditions from diagnosis through rehabilitation.

OCI employs only Board Certified or Board Eligible physicians who are chosen for their caring attitudes, as well as their superior medical and surgical skills. Through their advanced training and experience, they’re able to perform leading edge, minimally invasive procedures that not only have shorter recovery times, but exceptional outcomes for our patients. Our orthopedists are supported by a compassionate staff, a convenient on-site radiology department, physical and occupational therapy, and other related clinics for joint reconstruction, spines, hands, shoulders, feet, fractures, and injuries.

From foot injuries and total joint replacements to open air MRIs and a state-of-the-art physical therapy clinic, OCI is truly a world-class center for all of your orthopedic needs.

If your doctor has referred you to us, rest assured that our excellent staff at the Orthopedic Center of Illinois will work closely with his or her office, keeping them informed of your progress.

Have your doctor or their staff contact us with any questions he or you may have about a referral to set up an appointment or an initial examination.

Insurance Plans We Accept. Orthopedic Center of Illinois accepts most insurance plans and is a participating provider of most common plans in the Central Illinois area.

If your insurance plan requires a referral, we recommend that you obtain it prior to your visit. If your plan requires a co-pay, you will be expected to pay it at the time of service.

Visit our website for a complete list of insurance plans we accept and our financial policy: www.orthocenterillinois.com.

**A Team of Skilled,
*Board-Certified Physicians and Therapists.***

To provide our patients with world-class physicians for their particular needs, the Orthopedic Center of Illinois is proud to be staffed with Board Certified or Board Eligible, dedicated and respected super specialists who provide a higher, more focused level of skills with unsurpassed operative and minimally invasive expertise.

The super specialists at the Orthopedic Center of Illinois concentrate on feet and ankles, hands and shoulders, necks and spines, hip and knees, fractures and sports injuries.

In fact, each of our clinics is a center of excellence where our super specialists collaborate—daily, casually and formally—in every aspect of orthopedic care to enhance each patient’s diagnosis, treatment, rehabilitation and outcome.

By combining decades of cumulative orthopedic experience and sharing our collective knowledge, we can ensure the best possible approach for our patients’ bone injuries, musculoskeletal problems and nerve issues, from their neck to their toes.

For detailed biographies and specialties of our physicians and therapists, visit www.orthocenterillinois.com.

**We Welcome Recommendations
*from Other Physicians.***

Common surgeries that our joint super specialists perform include:

Knees:

- Knee arthroscopy
- Partial knee replacements
- Patellofemoral replacements
- Total knee replacements

Hips:

- Hip resurfacing
- Anterior hip approach
- Total hip replacements
- Fractures around the hip
- Malunions around the hip
- Hip arthroscopy

Shoulders:

- Total shoulder replacements
- Reverse shoulder replacements
- Realignment osteotomies

“Dr. Ludwig answered any questions I had and carefully explained the procedure for hip replacement. I felt at ease facing surgery and during the follow-up examinations. I was vey satisfied and glad I chose OCI.”
 – Connie R., Jacksonville, IL

The Hippest Joint In Town.
Or Anywhere Else.

Chronic hip pain. Constant knee discomfort. Persistent shoulder aches.

According to the National Institute of Arthritis and Musculoskeletal Skin Diseases, over 773,000 Americans have a hip or knee joint replaced each year—and the Joint Reconstruction Center at OCI performs more replacements than any other facility in central Illinois.

From hip resurfacing to minimally invasive total knee replacements, our passionate physicians’ use of innovative new technologies and progressive treatment alternatives place the Joint Reconstruction Center at OCI at the forefront for treating surgical joint reconstruction and bone disorders. We also offer non-surgical options such as injections and therapy to relieve pain and suffering.

Your visit begins with a thorough examination so that we can determine the best treatment option for your particular need.

Our Spine Center of Illinois super specialists offer the following:

Spine Services:

- Minimally invasive techniques
- Fusion techniques, open and minimally invasive
- Cervical and lumbar disc replacement
- Herniated discs
- Nerve root decompression

Other Treatments:

- Neck and low back
- Fractures, tumors and infectious conditions

Non-Surgical Pain Management Conditions include:

- Lumbar or cervical disc herniations, radiculopathy and sciatica
- Whiplash syndrome
- Low back, hip, neck and shoulder pain
- Disc, facet and nerve root pain
- Failed back syndrome
- Musculoskeletal pain
- Occupational injuries
- Osteoarthritis
- Musculoskeletal pain
- Spinal stenosis and sciatica

“I had spine surgery on a Thursday, was home on Friday and back to work a week later. I noticed immediate relief... and it was one of the best decisions I’ve ever made.”
 – Beth K., Springfield, IL

Fully Comprehensive Care
From Your Neck to Lower Back.

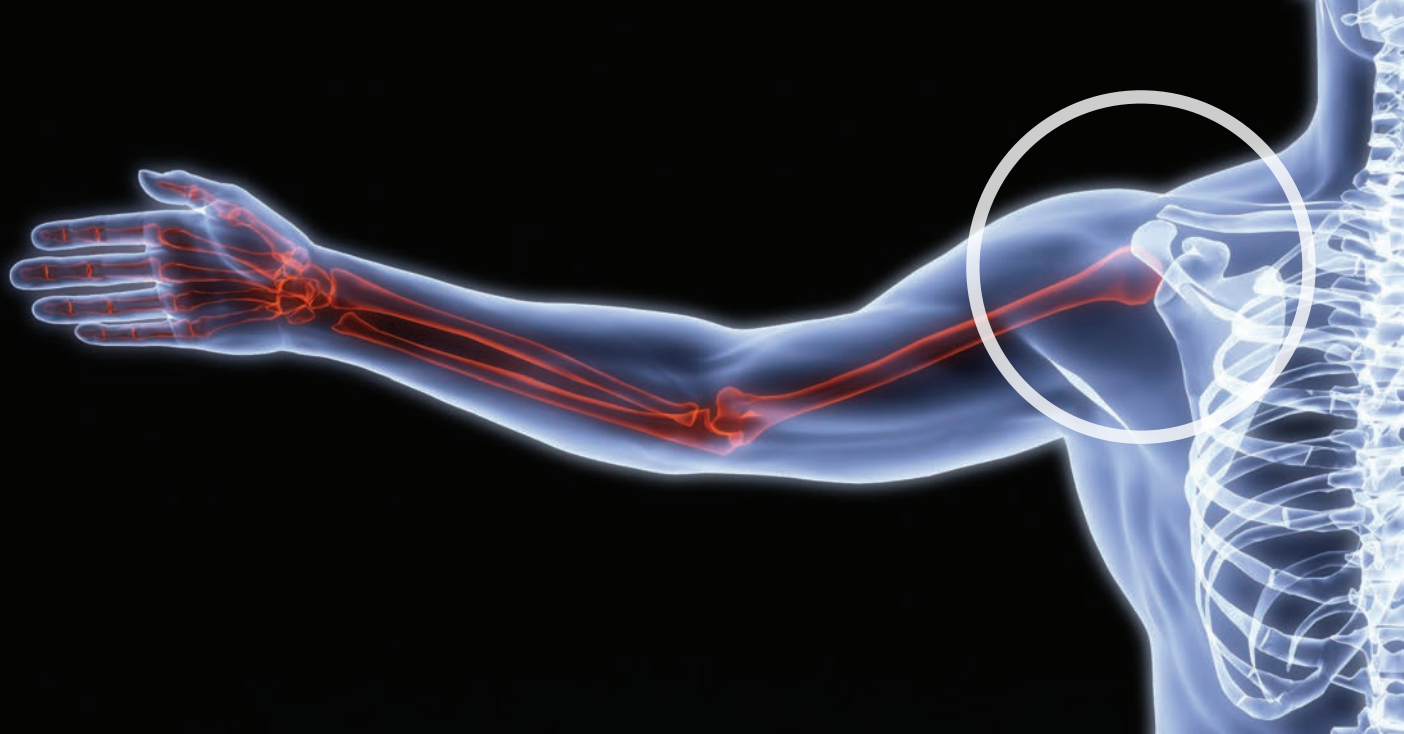

Broken vertebrae. Herniated disks. Spinal stenosis. Debilitating neck pain. Infections.

Spinal conditions and injuries can literally knock you off your feet, making it uncomfortable, if not impossible, to move from one place to another. The Spine Center of Illinois is the only true Center of Excellence in central Illinois that provides comprehensive treatment of both simple and complex spinal problems, all in one location without having to travel to different areas for cutting-edge care.

Our highly experienced, dedicated spinal specialists are expertly trained in the latest state-of-the-art spinal procedures, including minimally invasive surgery and non-operative techniques, cervical and lumbar disc replacements or fusions for herniated discs, reconstructive and restorative procedures. Our doctors also treat spinal tumors and a full range of cervical, thoracic, and lumbar spine disorders.

For patients who don’t require surgery, The Spine Center of Illinois provides non-surgical pain management for a variety of conditions, from herniated discs and sciatica to whiplash and nerve root pain.

Common problems treated at The Hand & Shoulder Center at OCI include:

- Thumb carpo-metacarpal (CMC) joint arthritis
- Arthritis of the shoulder, elbow, or finger joints
- Shoulder arthroscopy, rotator cuff repair, shoulder stabilization, AC joint reconstruction
- Fractures of any bone in your hand, wrist, or arm up to your clavicle
- Wrist and finger arthritis, trigger fingers
- Carpal tunnel and cubital tunnel syndrome
- Shoulder (labral) joint tears
- Repair any damaged nerves, blood vessels, tendons and ligaments of your hand and arm
- Elbow arthroscopy, tennis elbow
- Shoulder replacements

“I live in Alaska and saw a local orthopedic surgeon for my shoulder. He wanted to just do a replacement, I thought I needed a second opinion, called my brother in Illinois, and he said Dr. Maender at OCI was the best you could find. He was right. Since my shoulder surgery, I haven’t had any pain and my recovery was a cinch.”
 – John K., Sterling, AK

Hands-On Expertise
From Arthritis to Congenital Conditions.

**A clicking sound in your shoulder. Muscle aches in your wrists.
 An immovable shoulder joint. Numbness. Stiffness. Trigger fingers.**

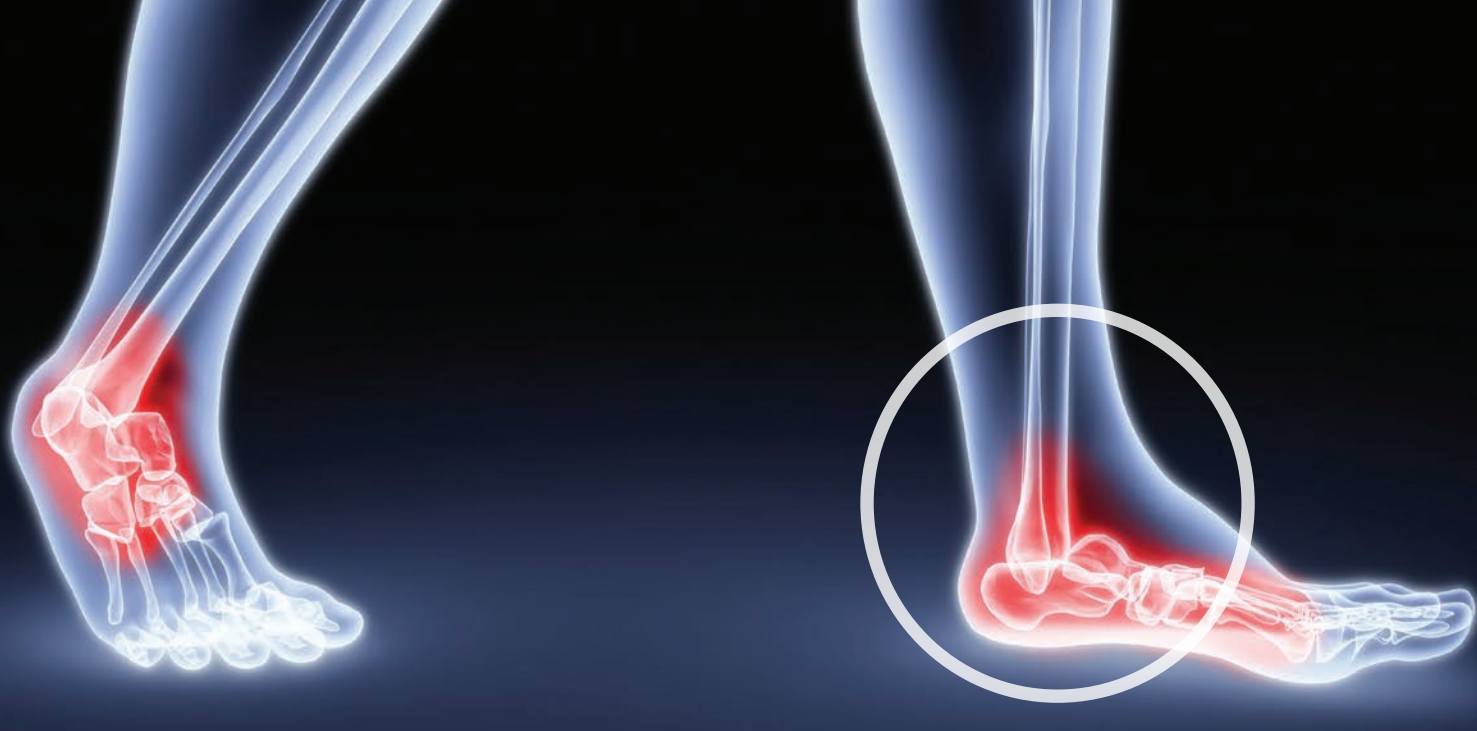

Our specialized Hand & Shoulder Center at OCI provides a comprehensive range of diagnosis and treatment for any pain or injury in the bones, joints, tendons and nerves of your fingers, hands, wrists, lower arms, elbows, upper arms, and shoulders.

Our team specializes in minimally invasive arthroscopic procedures to help detect and treat problems, as well as total joint replacements of fingers, elbows, wrists, and shoulders.

Our passionate physicians are Board Certified by the American Board of Orthopedic Surgeons to offer reconstructive care for arthritic conditions, nerve compression syndromes, tumors and congenital conditions.

This Center of Excellence works hand-in-hand with Midwest Imaging at OCI to capture digital x-rays and images of what ails you, Midwest Rehab at OCI for physical therapy, and The Occupational Medicine Group at OCI to get you back to work quickly after a hand or shoulder injury.

Common problems treated at The Orthopedic Foot & Ankle Center OCI include:

- Arthritis and deformity of ankles
- Painful feet
- Forefoot and hindfoot deformities
- Sports injuries
- Traumas
- Ankle arthroscopy
- Arthroscopic ankle fusion
- Flatfoot correction
- Ankle replacements
- Fractures of ankles and feet

“I came to the Orthopedic Foot and Ankle Center at OCI to see Dr. Idusuyi. He was very prompt and respectful of time. Furthermore, I was very pleased with the time he spent with me and how thoroughly he answered all of my questions. Since my foot surgery, I’m finally living pain-free!”

– Tonya M., Chatham, IL

LEADING-EDGE Techniques
to Get You Back On Your Feet Again.

Arthritic feet. Strained ligaments. Sprained ankles. Broken toes. Bunions. Chronic pain.

The Orthopedic Foot & Ankle Center at OCI specializes in the treatment of the full range of foot and ankle conditions for both adults and children, including arthritis, bunions, various sports injuries and traumas from sprained ankles to fractures, as well as forefoot and hindfoot deformities.

The human body relies on the strength of 26 bones, 33 joints, 20 muscles, and 100 ligaments in the feet to sufficiently support its weight. Whether you’ve had an injury, an accident, or have simply been wearing shoes without proper support, the OCI team of foot and ankle super specialists knows how important it is to ensure that every one of these parts is operating comfortably and efficiently.

Our physicians utilize the most current methods of diagnosis and treatments available, focusing on minimally invasive techniques and the latest medications, braces, and orthotics. If surgery should become necessary, our doctors have extensive experience with anything you may need, from removing bunions to setting broken bones to complex reconstructions.

Common problems treated here related to falls and accidents include:

- Sports related injuries
- Shoulder dislocations
- Tennis elbow
- Anterior cruciate ligament tears
- Dislocated knees
- Wrist injuries

Common surgeries can include:

- Arthroscopic rotator cuff repairs
- Arthroscopic shoulder stabilizations
- ACL reconstructions
- Meniscal repairs
- Articular cartilage restoration procedures
- Reconstructive knee procedures

“My son fractured his wrist. Dr. Mulshine said he had a displaced fracture and called Dr. Herrin at the Surgery Center. We were out of surgery and back home for dinner. The care we received was excellent. I am so glad that we were able to walk-in to the Fracture Center instead of going to the ER!”

– Laurie R., Taylorville, IL

Faster Than The E.R. For Injuries
Walk-Ins Accepted For Acute Injuries

Concussions. Broken legs. Mangled arms. Jammed shoulders. Dislocated knees or shoulders.

Whether you're a non-athlete who suffered an acute injury, a broken bone, or an accident, or you're a recreational athlete, a high school team member, a college competitor or even a pro who suffered a sports injury, each of the compassionate super specialists at The Fracture & Injury Center at OCI strives to provide a superior level of quality medical services—with minimally invasive treatments or surgery, if required.

As any athlete or weekend warrior knows, nothing is more debilitating than being kept away from the sports or activities they love. That's why we offer comprehensive services in a single location for the diagnosis, treatment, pain management and rehabilitation of virtually any injury.

Our goal is to get you back doing what you love as safely and quickly as possible, in less time and for less cost than visiting a hospital Emergency Room.

Midwest Imaging at OCI provides clear pictures of your head, spine and other parts of your body. Features include:

Short-Bore MRI:

- More headroom, legroom and elbow room than other traditional MRIs
- Patients won't feel nose-to-nose with magnet
- 1.5 Tesla magnet for superior resolution in less time compared to open MRI

Open MRI:

- Reduces patient feelings of claustrophobia in an anxiety-free atmosphere
- Outstanding image accuracy
- High resolution images in less time

"I was in extreme pain and it was very difficult to get me in the MRIs and x-rays. They worked with me with painstaking patience and kindness to get what Dr. Romanelli and Dr. Williams needed."

– Marcia T., Springfield

We Make Positive Outcomes Out of Negatives

With State-Of-The-Art Musculoskeletal Imaging.

CT Scanner. MRIs. EMG. Bone Density Scans. Digital Radiography.

Midwest Imaging at OCI provides a comprehensive range of leading-edge diagnostic tools to ensure you get the most accurate diagnosis of your condition possible. Our convenient in-house Radiology Department allows our doctors to order and read your x-ray during your appointment.

For the most accurate diagnosis, we utilize a high-field strength, state-of-the-art Magnetic Resonance Imaging scanner in Springfield, plus an Open MRI in an anxiety-free atmosphere in both our Springfield and Jacksonville offices.

Our safe, fast CT scanner offers a common medical imaging procedure, often called a CAT scan, which combines x-rays and computers for a 2-D or 3-D image.

Midwest Imaging at OCI also provides painless, non-invasive bone density testing, administered by licensed x-ray technologists, to determine your risk of osteoporosis. Finally, we provide electromyography (EMG) and nerve conduction studies (NCS) in our electrodiagnostic suite to assess nerve injuries, such as the neck, back, or carpal tunnel.

Midwest Rehab at OCI provides the following services:

- Physical therapy
- Occupational therapy
- Work hardening
- Aqua therapy
- Functional capacity evaluations
- Post-therapy conditioning programs
- Post-job offer screenings
- Massage therapy

“My care in the hands of Midwest Rehab at OCI was nothing short of miraculous! The cooperation of the OCI team and the therapists at Midwest Rehab are the reasons that one year after my accident (shattered ankles, both knees and right hip), I am walking, working and well on my way to being 100% healed. ‘Thank you’ seems like such small words to express my gratitude.”
 – Bill S., Springfield, IL

Your Road to Recovery
Through Physical and Occupational Therapy.

Will you be able to work on a scaffold or operate heavy machinery after an accident? Will you swing a tennis racket with the same confidence? Will your back pain finally go away? Your road to recovery for comprehensive physical and occupational therapy starts at Midwest Rehab at OCI in Springfield.

Whether you’ve experienced orthopedic or sports injuries or musculoskeletal problems, we offer decades of cumulative experience, the highest echelon of quality care, and compassionate treatment to heal you before and after surgery.

From your initial consultation to your final visit, the licensed, highly trained physical and occupational therapists and assistants at Midwest Rehab at OCI have a single goal: to provide the most effective treatment for your individual needs. Each therapist incorporates multi-modal treatment approaches and client education, which may include an exercise program, kinetic and conditioning machines, or hydrotherapy in our state-of-the-art pool with integrated treadmill.

Because it’s more important to avoid accidents that require physical therapy, Midwest Rehab at OCI also offers accident prevention and wellness programs for employees, either at the workplace or at our facility.

Meet The
Super Specialists at OCI

We Know How To Work
With Work-Related Injuries.

For more information, call the Injured Worker Hotline at 217-725-3723.

Time away from work can cost any company money.

At the Occupational Medicine Group at OCI, our physicians and staff are proficient at diagnosing potential risks and weaknesses before they become full-blown injuries. But when injuries do occur, we specialize in getting employees back on the job as soon as possible, ensuring their continued income, greatly reducing lost hours, and lowering medical and insurance costs.

With decades of experience focusing on the early diagnosis, prevention, treatment and follow-up of work-related injuries, our staff embraces workers' compensation best practices.

The Occupational Medicine Group at OCI offers the following comprehensive services:

- Same day appointments with a physician, typically within 24 hours
- Customized treatment plans with our team to keep your employees working
- Wellness promoted in the workplace to control experiences
- Fitness For Duty Exams for work-related and non-work related illnesses
- State-of-the-art diagnostic and treatment center, including a traditional MRI, Open MRI, CT Scanner, and Bone Density Scanner
- A highly respected, on-site rehabilitation center staffed by licensed physical therapists for work conditioning, spinal rehab, and aerobic exercise

The Occupational Medicine Group at OCI provides the following:

Conditions Treated:

- Back/neck
- Muscle strains/ligamentous sprains
- Post-surgical
- Degenerative
- Fractures/dislocations
- Repetitive/overuse injuries
- Neurological

“One of our roofers shot a nail gun through his leg. I remembered that OCI had an Occ. Med program that specializes in injury care and treatment. My worker was given immediate attention and the nail was removed. I couldn’t believe how quickly they took care of us and how well we were treated.”

– Randy Doty, Springfield, IL
